DETAILED ACTION

Applicant's cancellation of claims 20, 28 and 36 and the amendment of claims 1, 7, 9, 13, 21 and 29, in the paper of 10/5/2007, is acknowledged. Claims 1-19, 21-27 and 29-35 are at issue and are present for examination.

Applicants' arguments filed on 10/5/2007, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Upon further consideration the following rejections are considered to apply to applicants claims, thus necessitating the following non-final rejection. Any inconvenience to applicants is apologized for.

Claim Objections

Claims 5 and 10 are objected to because of the following informalities:

Claims 5 and 10 depend from rejected claims 1 and 9, respectively.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application

by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4, 6-9, 11-19, 21-27 and 29-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Meyers et al. (U.S. Patent No. 6,656,698 B1).

Meyers et al. teach a novel human kinase-like molecule and methods for identifying a compound which modulates the activity of said kinase-like polypeptide comprising combining the polypeptide or a cell expressing the polypeptide such as a human lung cell with a test compound and determining the effect of the test compound on the activity of the polypeptide using a kinase assay. While it is recognized that Meyers et al. specifically teach the kinase-like polypeptide of SEQ IDS NO: 2, the methods taught by Meyers et al., that is the measurement of kinase activity in human lung cells anticipates the claimed methods on the basis that the 14189 polypeptide of the instant claims is inherently in the human lung cells assayed by Meyers et al., thus contributing to the assayed kinase activity.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 6-9, 11-19, 21-27 and 29-35 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,656,698 B1. An obvious type double patenting rejection is appropriate where conflicting claims are not identical, but an examined application claim is not patentably distinct from the reference claim(s) because the claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g.., *In*

re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re* Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re* Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985).

Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-10 of U.S. Patent No. 6,656,698 B1 drawn to a method for identifying a compound which modulates the activity of said kinase-like polypeptide comprising combining the polypeptide or a cell expressing the polypeptide such as a human lung cell with a test compound and determining the effect of the test compound on the activity of the polypeptide using a kinase assay anticipates claims 1-4, 6-9, 11-19, 21-27 and 29-35 of the instant application.
